RESEARCH

Self-Attribution Is Not Self-Recognition: A Peer Baseline for LLM Judges

Under review, JUDGE @ NeurIPS 2026

- First author, advised by Philo Juang (Google DeepMind). Five frontier LLM judges over 190 responses, each scored against a peer baseline: Claude names its own writing 86.8% of the time against 53.9% for its peers ($p = 1.6 \times 10^{-4}$), and an 18-feature stylometric classifier (86.3%) beats every judge.

Do LLM Fingerprints Survive Outside English?

Poster submitted, IEEE MIT URTC 2026

- First author, advised by Philo Juang (Google DeepMind). 840 responses from five models in seven languages: attribution holds at 59–72% in every language against 20% chance, with no drop for low-resource languages, and survives machine translation.

Proximity, Not Transmission: What the Patent Record Can and Cannot Show About NLP and Surveillance

Submitting, AI for Peace @ NeurIPS 2026

- First author, with Michael Tarekegn. Linked 127,851 ACL Anthology papers to the 9,048 USPTO patents citing them; name-blind coding finds 0.46% surveillance, no different from science-citing patents of the same era (OR 1.03, 95% CI 0.38–2.78).

How Robust Are the Legatum Prosperity Index Rankings?

Accepted with revisions, Journal of High School Science

- First author, with Ryan Erlikhman. Derived rank leverage, $c^2(1 - p^2)$, which tracks Sobol’ total effects over a 131,072-run design (Spearman 0.91–0.99); the ranking holds globally but not mid-table, where the median 90% rank interval spans 36 places.

COMPETITIONS

- 1st place, VISION HACK: South LA** (Council District 9 Champion, U18). Ledger: led the build across the vision pipeline, rule engine and frontend, and wrote the two-pass vision pipeline, the dashboard and renewal calendar, and the static fallback.
- 1st place, Decode the Ocean Hackathon** (Lovable × United Nations). eDNAtlas: live coastal health scores from environmental DNA.
- 3rd place internationally, Code for Transportation** (Young Coders’ Sphere). Safe Routes to School: A* over 431,599 crime-scored LA blocks, entirely in the browser; the bus cuts a student’s exposure by up to 80%.
- Finalist (top 8), Citadel High School Terminal 2026** · **Y Combinator Startup School 2026**, sub-5% acceptance, \$30,000+ in credits
